LONG ISLAND

Is 130 miles long and 27 miles wide. It forms Long Island Sound and New York Harbor. It extends easterly into the Atlantic Ocean, lying directly across the path of the Summer South winds. Its fanciful resemblance to a whale is very marked, the western end, the rounded head, is occupied by Brooklyn, the tip of the South fluke by Montauk, tip of the North fluke by Orient. The flukes form Gardiner's and Peconic Bays and protect Shelter Island. It is served by a railroad, equipped with all modern conveniences, it possesses a pure water supply, specially good drainage and uncontaminated atmospheric conditions; hence it is a territory with exceptional attractions for Recreation, Rest or Permanent Residence. For detailed information address:

THE LONG ISLAND RAILROAD COMPANY
263 FIFTH AVENUE, NEW YORK CITY
HOWARD M. SMITH, Gen'l Passenger Agt. H. B. FULLERTON, Sp. Agt. Passenger Dept.

LONG ISLAND'S CENTRAL SECTION

Attractions: A healthy and fertile country. Pure water and perfect drainage, fine fruits, vegetables and flowers. Particularly favorable conditions for squab and poultry raising. Quickly and easily reached from New York City, hence suitable for permanent residence.

Served by: Main Line, Montauk Division, Wading River Branch and Oyster Bay Branch.

Telegraph and telephone to all points.
